Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 & 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Matze et al., (U.S. Patent number 5907672).

1. As per claim 1, Matze et al., (Matze) teaches (col. 6, lines 3-5) an incremental image backup which supports all the functionality and performance of a full image backup. He thus teaches a disk storage system and sequential storage media that performs a physical device level backup of data from the disk storage to the sequential storage media, comprising a complete image backup of data. He also teaches (col. 5, 57-59) his backup system allows user to restore only selected files from the backup. He also teaches (col. 5, lines 64-66) that the backup process can determine which sectors need to be included at the beginning of the tape by understanding the on-line disk volume format. He thus teaches the limitations pertain to performing a logical restore of data on a file by file basis from physically backed data on the sequential storage media, locating files requested by the client, the files defined in accordance with a files system defined by the client.

3. As per claim 2, He teaches (col. 5, lines 56-59) that a backup image may be restored by completely restoring the logical image to a disk. His system allows the user to restore only selected files from the backup. He thus teaches limitations pertain to a user request through the

client a disaster recovery, and the client specifying all files of the file system for a logical restore to restore all files of the file system.

Allowable Subject Matter

4. Claims 3 & 4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
